

## Tables

**Table 1. Explanations of party support for the European Parliament**

Model	1	2	3	4	5
Year of cross-section	2010	2010	2010	2010	2010
Liberal-conservative (gal-tan)	-0.2 (0.03)*		-0.2 (0.04)*	-0.06 (0.02)*	-0.3 (0.04)*
Left-right dimension (economic)		0.01 (0.04)	0.1 (0.04)*	-0.07 (0.02)*	0.1 (0.04)*
Party support for European integration				0.6 (0.04)*	
Country dummy variables					Yes
Constant	6.0 (0.2)*	4.9 (0.3)*	5.6 (0.3)*	2.7 (0.2)*	5.7 (0.5)*
Observations	151	151	151	151	151
r-square	0.2	0.0008	0.2	0.7	0.5

Note: ° p<.1, \* p<.05. Models 1-4 are OLS estimations with robust, country-clustered standard errors in parentheses. Model 5 has robust standard errors and includes country-dummy variables. Earlier cross-sections are in the Appendix (Table A2).

**Table 2. Determinants of national parliamentary oversight institutions**

	1	2	3	4	5	6
Support for the EP	-0.2 (0.1)*	-0.2 (0.1)*	-0.2 (0.1)*	-0.2 (0.1)*	-0.2 (0.1)°	-0.02 (0.01)*
Treaty phase		0.2 (0.04)*	0.1 (0.04)*	0.1 (0.04)*	0.1 (0.04)*	0.006 (0.01)
Euroscepticism			0.005 (0.003)°	0.005 (0.003)°	0.006 (0.003)°	-0.0002 (0.0003)
Committee strength				0.07 (0.03)*	0.07 (0.03)*	0.004 (0.002)
Support for integration					0.02 (0.1)	
Lagged dependent variable						0.9 (0.02)*
Constant	2.2 (0.4)*	1.9 (0.4)*	2.0 (0.4)*	1.7 (0.4)*	1.6 (0.4)*	0.1 (0.1)*
Observations	223	223	223	218	218	211
r-square	0.2	0.3	0.3	0.5	0.5	1

Note: ° p<.1, \* p<.05. The models are OLS estimations with robust, country-clustered standard errors.
